Rob,

The Boulevard Glare Study has been replaced with higher resolution files on the FTP site.

Thanks,
Megan

Megan,
The 16MB file looks good. Please upload that in four files and let me know when its ready.
Thanks,
Rob

Hi Rob,

See attached. The original file is 53MB, which would require splitting it up into 11 parts to post to the website. I've attached a reduced file that is 16 MB (so would require 4 parts) that I believe still retains some quality of images, unlike the 4.6MB version we uploaded to the FTP. Let me know if the attached version is OK and I can split it into 4 parts and post to the FTP.

Thanks,
Megan

Mindy and Megan,

I believe higher resolution files should be provided for Appendix 2.1-3, Boulevard Glare Study. At the given resolution tables and figures are barely readable, and when magnified on screen (as many reviewers may do) the quality degrades further. Printing the pages provides little, if any, improvement.

Thanks,
Rob

Thanks Megan, I think I got everything over to Bets for the website. We'll keep you posted on the progress on our end.

The groundwater reports are all now posted. Some had to be split into multiple (6-7) parts. Sorry about that.

Thanks,
Megan

Hi Mindy,

The electronic files of the EIR and most technical appendices have been uploaded to the FTP site and are ready for the County to download. All files are either under 5 MB in size, or have been split into multiple parts.

We are still working on the four groundwater investigation reports. They are all around 40 MB and we are trying to reduce their size so that we don't have to split each into 8 parts. We will get these up on the FTP sometime tonight.

We will deliver 15 hard copies of the Executive Summary and 15 CDs tomorrow by 5PM.

Thanks,
Megan
